We would like to express our gratitude for your kind agreement to deliver a course on **Aerospace Materials: Microstructure, Fracture and Fatigue** at the **Indian Institute of Technology Gandhinagar**, during the period of **11th June to 22nd June 2018**. This course was supported under the **Global Initiative of Academic Networks (GIAN)** in **Higher Education** by Ministry of Human Resource Development, India.

This initiative is aimed at tapping the talent pool of scientists and entrepreneurs, internationally to encourage their engagement with the institutes of Higher Education in India so as to augment the country's existing academic resources, accelerate the pace of quality reform, and elevate India's scientific and technological capacity to global excellence.

The course was attended by students (both graduate and undergraduate), faculty members from various engineering institutes, and researchers from various research organizations. The content covered by you was extremely relevant to today's research in aerospace sector, and was appreciated widely by all the participants. The real life case studies shared by you based on your research experience were a unique takeaway for the audience.

We are greatly indebted by your kind gesture to be part of this course and would like to thank you for sharing your wisdom with us. We look forward to more such opportunities to learn from you.

With regards,

Amit Arora

Assistant Professor, Materials Science and Engineering
